Event presentation

SIÑAL EXHIBITION is supported by **The "Industries and Agro-Resource" Cluster** and organized by the local association **"Des Technologies et des Hommes"**.

All the institutional and industrial partners have integrated and implemented the Cités en Champagne initiative. Around the "Des Technologies et des Hommes" [Technologies and People] association, a true partnership was formed in order to promote jointly, and with one voice, the new opportunities provided by the non-food applications of bioresources.

SIÑAL EXHIBITION focuses on the **Biobased Products and Solutions**.

Every year, thanks to an effective business meeting system, SIÑAL EXHIBITION brings together **professionals, academics and researchers** around topics such as **biobased materials, plant-based chemistry and bioenergy**

- **300 participants** gathered over 2 days
- More than **2,000 pre-planned business meetings** arranged to identify commercial and technological opportunities
- **18 conferences and roundtables** to get informed on the latest trends and news
- Innovative companies awarded by **two innovation prizes**

Regional Plants visits

If at least 4 firms from Finland + the Embassy are interested to visit local plants, we will help to arrange a visit the day before; For instance, in 2014, a Dutch delegation visited the Pomacle biorefinery.

This visit was organized thanks to IAR Cluster.

Of course, we cannot guarantee you today the feasibility of the visit. Should the Embassy be interested, we will ask the IAR Cluster about it.

Conferences

All conferences are in French. If a number of non-French participants are interested by the conferences, we will consider a simultaneous translation.
